1. The following is an examiner's statement of reasons for allowance:

The prior art differs from the present claims in that the present claims comprises at least one compound of the formula I, which has a spiro[3.3]heptane with an alkenyl group attached to it. The LC medium also exhibits a negative dielectric anisotropy, which is useful for IPS and ECB display devices. The closest prior art (DE 4,235,975) discloses a methylene-spiro-alkane compound represented by formula (I). The reference fails to disclose the present compound. The reference compounds either contain fluorinated compounds or compounds having a methylene-spiro[3.3]heptane core structure. See Examples 1-7. Also, DE '975 LC media having a positive dielectric anisotropy are used in TN, STN and SBE display devices.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Shean C Wu whose telephone number is 571-272-1393. The examiner can normally be reached on 9-5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mark Huff can be reached on 571-272-1385. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
